EDUCATION

Vellore Institute of Technology

Bachelor's + Master's in Software Engineering (Integrated) - CGPA - 8.43

Jul 2019 - Aug 2024

Chennai, India

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Python, SQL
- **Mobile Development:** Java, Android Studio, Dart, Flutter
- **Tools & Technologies:** Squish, CI/CD, Docker, Jira, AWS, Git, Github
- **Databases:** MySQL, PostgreSQL, SQLite, NoSQL, MongoDB, Redis, Firebase
- **Frontend & Backend:** Tailwind CSS, JavaScript, ReactJS, Node.js, FastAPI, Django
- **Generative AI:** LLMs & APIs Integration, Retrieval-Augmented Generation (RAG), Langchain
- **Fundamentals:** Data Structures & Algorithms, OOPs, LLD & HLD Design, SOLID principles, ACID properties

PROFESSIONAL EXPERIENCE

Toadster Technologies

Software Engineer, On-site

Jan 2026 - Present

Noida, India

Stryker [🔗](#) | Python, Squish, BDD, TDD, Git, Gitlab, Sonar Cloud

Software Test Automation Engineer (Research & Development Intern), On-site

Jul 2023 - Jun 2024

Gurugram, India

- **Automated 50+ test cases** using **Python scripts** with **Squish and BDD**, reducing test execution time by **50%** and improving accuracy by **40%**.
- **Mentored** new team member in test automation methodologies, achieving a **30% increase** in coding efficiency.
- **Enhanced** the framework and **refactored** code, aligning with evolving project requirements, leading to a **20% improvement** in overall **framework performance**.

Ridobiko Bike Rentals [🔗](#) | Dart, Flutter, Git, GitHub

Flutter Developer Intern, Remote

Nov 2022

Gurugram, India

- Developed **Invoice Bill generation functionality** and **improved user interface**, fixed **30+ bugs**, enhancing software performance and user experience.
- **Reduced** user-reported issues by **15%** and **increased** user satisfaction **ratings by 25%** through targeted UI improvements.

PROJECTS

Blood Point Application [🔗](#) | Java, Firebase, Google Maps API

- Developed a **blood donation application** using **Firebase** to streamline the donation process for donors and recipients, increasing donor **availability by 60%**, improving matching with recipients.
- Integrated **Google Maps** for navigation assistance, enhancing usability and accessibility by **20%**, with **65+** users registered as donors and receivers.

Covid-19 Application [🔗](#) | Dart, Flutter, REST API

- Created a **Flutter application** for monitoring **COVID-19 cases globally** and by country, tracking daily COVID-19 cases with updates reflecting a **25% rise in reported cases**.
- Delivered a **comprehensive** and **up-to-date** view of the pandemic situation with an accuracy of **90%**, and **enhanced** user engagement with a user-friendly interface, resulting in **50+** users.

Toxic Comments Classifier [🔗](#) | Python, Machine Learning, NLP, NLTK, TF-IDF

- Built a **scalable multi-label toxic comment classification system** using **classification algorithms** in Python (Scikit-learn), achieved up to **93% F1-score** across six toxicity categories using a dataset of **160k comments**.
- Engineered a robust **NLP pipeline** utilizing **regex, NLTK, and TF-IDF vectorization**; resolved extreme **class imbalance** through targeted undersampling, improving rare-category F1-scores up to **80%**.
- Benchmarked **six classification algorithms** (Logistic Regression, KNN, Bernoulli Naive Bayes, Multinomial Naive Bayes, SVM, Random Forest Classifier) using **F1-score** as the **primary evaluation metric**.
- Selected **Random Forest** for achieving the accuracy, implemented **model persistence** using **Pickle** to build a **modular system**, enabling **batch and real-time inference**, boosting efficiency by **20%**, and scaling **toxicity detection** capabilities.
